

ACCESS PANELS FOR SHAFT WALLS

At Ceildoor we offer a specific range of access panels which have been **designed and manufactured to be installed into shaft walls**. Across the range you can choose between **different door and frame combinations** to suit your project. You can pick from either a from metal or plaster faced door and either a picture or a beaded frame.

The 2 hour fire rated and shaft wall access panels have been designed and tested to **comply with fire resistance in accordance to BS 476 Part 22 for 120 minutes integrity performance**.

All our fire-rated access panels are suitable for use as inspection hatches for boilers, gas cookers and open hearths. By installing Ceildoor fire-rated access panels, you can ensure your building **complies with Part J building regulations** which require safe access to concealed heat producing appliances for maintenance.

As standard all Ceildoor metal access panels are fully **powder-coated in white RAL 9010** in matt polyester paint on all sides of the door and frame, inside and out, along with being fitted with a **budget lock**.

We **stock a range of different door sizes across the shaft wall range**. Standard sizes includes, but is not limited to: 300x300mm, 450x450mm, 600x600mm, 900x600mm. We also offer a **bespoke manufacturing service** where we can manufacture to your exact sizing requirements. With all of our access panels please ensure your structural opening is 10mm greater than the door size ordered.
