

ACCESS PANELS FOR WALLS

At Ceildoor we offer a wide range of different access panels which have been **designed and manufactured to be installed into wall environments**. Across our ranges you can **choose between different door and frame combinations** to suit your project. With the majority of our ranges you can pick from either a from metal or plaster faced door and either a picture or a beaded frame.

As standard all Ceildoor metal access panels are fully **powder-coated in white RAL 9010** in matt polyester paint on all sides of the door and frame, inside and out, along with being fitted with a **budget lock**. Other colours and locks are available on some product ranges.

We **stock a range of different door sizes across the majority of our product ranges**. Standard sizes includes, but is not limited to: 150x150mm, 200x200mm, 300x300mm, 450x450mm, 600x600mm, 600x450mm, 900x600mm and 1200x600mm. We also offer a **bespoke manufacturing service** where we can manufacture to your exact sizing requirements. With all of our access panels please ensure your structural opening is 10mm greater than the door size ordered.

The **Unihatch range is our most versatile product for use in wall environments**. The Unihatch range offers flexibility with different door finishes, which you can simply switch between by turning the door over, along with a 360° Hinge System. The 360° Hinge System allows the door to be removed and re-hinged on any side of the frame, even after installation.

Access panels from the following ranges are suitable to be installed in wall environments:

- **Non Fire Rated / standard**
- **1 Hour Fire Rated**
- **2 Hour Fire Rated**
- **Unihatch**
- **Acoustic**
- **Air-Tight**
- **Anti-Tamper**
- **Bespoke**
- **Chameleon for tiled walls**
- **Essential**
- **Slimline**

Our product range for walls also includes **suitable access hatches for Part J regulation compliance**.
